

## Poornakumbha "A single solution for many problems"

**Name:** Bharatbhai Devjibhai Sadadiya

**Contact No.:** +91- 8140514417

**Address:** Post – Shiyani, Ta – Limbdi,  
Dist – Surendranagar

### Introduction

Bharatbhai Devjibhai Sadadiya is practicing farming since last twelve years in Surendranagar district of Gujarat. He is practicing agriculture on 35 acres of land.

### Farming Pattern

He takes two cycle of crops per year with three different crops. Cotton and Sorghum are mainly cultivated in rainy season and Cumin during winter season. He incurs a cost of around Rs.1300 per day for irrigation purpose.

### Average Income

The total yield of Cotton is 800Kg from 23 acres of land generating an income of Rs 6.45 lacs and 240 Kg of Cumin generating revenue of Rs 1.5 lacs, Sorghum is used as grass. The total revenue generated by supplying 80 tonnes of agricultural biomass is around Rs. 45,000/- to 50,000/- .

### Poornakumbha " Making a Difference"

Mr. Bharat came in contact with Poornakumbha during an awareness workshop organized by Poornakumbha volunteers. They educate farmers about the demerits of burning agricultural residues and how it adversely affects soil quality leading to lower yields in the long run.

Mr. Bharat understood that open air burning of biomass deteriorates land quality contributing to air pollution. Since three years, he is supplying biomass to Poornakumbha, which generates additional income for him which he has invested in real estate.

Thus Poornakumbha supports farmers in monetary way and also provide them education and training to carry out their farming practices in a more sustainable way without harming human and environmental health.
